#### A BLUFF POLL

Nothing has happened in California to change either the political situation or any Californian estimate. But
there has been a sudden change in
the last down a last determined to the Fastern outle

farther East have been making the same assertion for over a week.

Obviously, if nothing happens in California, but something happens in the Eastern reports of California, we must seek an Eastern explanation. And that is the case this time. What has happened is the New York Heroid's profits nor nationalism, and it largely poll. That poll, bostile and partisan, is ignores political reforms, because it hallows the factors, because it hallows that it happened is some of the States, lieves that all nuestions are funded. That poll, hostile and partisan, is poll. That poll, bostle and portisan, 18 ignores political reforms, because it nevertheless, as to some of the states, believes that all questions are fundamentally economic and not political mentally economic poil, in the first place, was taken or the Los Angeles Times, the most brazen faisitier in the newspaper world, that would discredit it, if there were nothing more. And the poil is based.

Between eighteenth century reaction in large part, on the vote on congress-men. All the voters for Kahn (who had no opposition) and for Knowland and Needham, are counted as Taft voters, and most of the stay-at homes are counted, for Wilson or Taft. A little revolutions—choose ye! figuring, on that hasis easily gives the state to Wilson, with Taft and Rousevelt running even for second place. The trouble is not with the figuring, but with the faise basis on which it is done.

Of course everybody in California knows, but Eastern readers might not realize, that the test in California was the vote, not on congressmen, but on legislative candidates. The presion legislative candidates. The presi-dential issue was involved directly in the legislative nominations, and only indirectly, or not at all, in the con-gressional nominations. In the con-gressional district in which Knowland was renominated, for instance, every assembly district returned a Roose-telt candidate, running on that issue. Knowland insisted that the presidential issue had nothing to do with his candidacy, and the result showed that his constituents agreed with similar situation, of course, existed in other districts.

Nobody in California could have Nohody in California could have been fooled by a poll, made avowedly in this way. But some people in the East have been fooled by it. This explanation of how it was done is made planation of how it was cone in merely as a warning against taking seriously any California news which may emanate from outside of Cali-fornia, in the next few days.

#### MORMON FRANKNESS

Following the open espousal of President Taft's cause by the Mormon church, the sermons at the Mormon conference at Salt Lake yesterday were largely devoted to exhorting the people- to . "follow .. the .. instructions .. of the prophet." One of these sermons however, made an additional point which is of more than Mormon inter which is of more than Mormon interest. "The multitude is not fit to rule itself," said Apostle Penrose (significant name!), "and would bring on themselves anarchy and tyranny. The law must be administered by the tribunals which have been raised up by God for the guidance of the people." And for this reason.

Penrose (Apostle Penrose) and the others assailed the Progressive conditate reached with an editoria, "Hats Off to the reinciples and urged support of President Total as the best representative differing and of the White House. The editorial ended:

the others as and the Progressive producing me arguerments of the contribution that the multitude is not fit to rule itself."

There are not many reactionaries as frank as the Mormon Arosite, but, glore of the doctrine that "the innext rincers and courages on the proposition in Rossevich and the fitting has been expected and the fitting of the opposition in Rossevich and the fitting has been expected and the fitting has always protect has been expected and the fitting that all the more distinguished by the fitting has been expected and the fitting that all the more fitting than the fitting has always been to attend committee.

It could sit in the legables as one has peep the more and the committee of the proposition of the proposition in the proposition of the proposition in the fitting has always been to attend committee.

It could be proposed the fitting has always been to attend committee.

It could sit in the legables as one of the proposition in the fitting has always been to attend committee.

It could sit in the legables as in California, and the proposition in the proposition in the fitting has always an expenditure of the fitting has always the assumption of the fitting has always the fitting that the fitting has always the fitting has always

"The same thing is true of what are termed moral and spiritual qualities; they are followed back into animal life and found to be gradually evolved like, all qualities of life.

"Though the mystery of life is still very dark, there are several safe conclusions to be drawn. The first is, that all life is one. By this is meant that tall life is one, and principle, one and clusions to be drawn. The tirst is, that all life is one. By this is meant that life is one. By this is meant that life is one. By this is meant that life is a universal principle, one and the same in every form, whether it be plant, animal, on human. This verdict of science is now unanimous. Mean may, as usual, denounce it on behalf of their medical theology, but it is a same to become universally accepted as fomorrow's sun is to rise; and this because it is misolutely true.

"It is indeed a revolutionary idea, and will greatly modify our general outlook. Another inevitable conclusion is, this life oriemple files the entire universe. Nothing less is now lugically thinkable. Life exists in worlds and spaces. To think less is the height of nresumption.

## SCHOOL

School days! Here they are again! Millions of American boys and girls marching into the schools every morning! And for what? They are the raw material out of which the schools are to manufacture good American citizens. The hope of the Republic is based on the schools of the Nation—and it is the duty of the schools to train the children not only to love their country but to understand the processes of its government.

How difficult it has been for the teachers to perform this particular duty is admitted by the teachers, regretted by the parents and proved by the pupils themselves. The dry-as-dust text books on civil government are to the actual processes of government what chemical formulae are to actual laboratory experiments. At last, however, there has come a book that visualizes the work of the American government and puts it before the reader as if he actually saw its wheels revolve and its engines drive. It is not a text book in the strict sense but it is a book that every boy and girl in school ought to read in order to illumine and enliven the books that are worked with in school. It is "The American Government" by Frederic J. Haskin and it is to be had so cheaply

that no family is to poor too own a copy.

Teachers and parents and pupils all agree that this book is what is required to make the study of civil government a pleasure and not a bore—a book to quicken the patriotism and stir the blood of every American.

GRAPE MOVEMENT REPORTED HEAVY

Unexpectedly Big Supply of Malagas Cause of the Shipments

According to the weekly letter is sued by Manager Frank B McKevitt of the California Fruit Distributors, the movement of grapes out of the state has been unsually heavy during the past week. The shipments were largely of Mulagna and the supply is reported to be menyectedly heavy for October. The report follows:

The following gives number of cars of decisious fruit shipped from all points in California for the week end-ing last evening:

ming last evening:

9EACHES—15 cars. The actual
movement of peaches in car lots has
reaved. A few scattering local shipments are still being made.

9EARS—43 cars. Fall and winter
varieties of pears are now nearly
cleaned up. There are still a few cars.

PEARS—45 cars. Fall and winter carricles of pears are now nearly releaned up. There are still a few cars, sowever, that will go forward during the next ten days.

GRAPES—642 cars. An unexpectedly eavy movement of Malagas has continued throughout the season, but mother wock's shipment will cover the arger portion of all that now remain. Pelarys continue to be shipped in considerable volume. After that time, sherrable volume. After that time, sowever, supplies will be very short. Some Cornichons and Emperors are now in evidence, but no straight carsons in evidence, but no straight carsons supplies will be very short.

ionds as yet, these varieties is expected to us considerably below the average.

The westher during the past week has been line, but is now threatening. Bain has failed in California south of the Tehachapi Soudd it reach the graps sections of Central California, great harm would probably be done to the few remaining Tokays. Cornichous and Emperors would not suffer.

Statement of Shipments.

#### DRUNKEN WOMAN IS TAKEN FROM TRAIN

Answering a call from the Southern Pacific depot early yesterady morning Patrolinan Hardenbrook found a woman "dead" drunk. The woman was loaded into an express wagon and hauled to jall where she was booked as Jane Doe. In a little hand bag was-found several letters addressed to Julia Mahuney, so it is thought that is the name of the woman. She will be tuken into court today. The woman hoarded the train at Bakernfield and her ticker read to Frenno. Just where and how the woman secured the liquor was not learned by the arresting officer, as the the woman secured the Human learned by the arresting officer, as the conductor, who put the woman off the conductor, who put the patrolmon ar-
